

# BEWARE OF BUSINESS EMAIL COMPROMISE

Business Email Compromise (BEC) is a cyberattack where attackers impersonate trusted individuals or organizations through emails to deceive victims into taking actions, such as transferring funds or sharing sensitive information.

## RECOGNIZING A BEC ATTACK

- Poor spelling, grammar and punctuation**  
BEC attempts often contain errors in language usage.
- Unusual formatting, appearance or domain**  
Be cautious of messages that look different from the sender's typical style or come from random domains.
- Non-official email address**  
Messages not originating from official email addresses or domains may indicate a BEC attack.
- Improper greeting or signature**  
Unusual greetings, signatures or contact information could suggest phishing attempts and BEC attacks.

- Email-only communication**  
If the sender avoids other channels of communication, it's suspicious.

- Urgency & rushed transactions**  
BEC attackers create a sense of urgency to manipulate victims into acting hastily.

- Unusual fund requests**  
Payment requests to uncommon addresses through unusual methods should be treated cautiously.

## ACT NOW TO PROTECT YOUR INBOX

We help you combat advanced cyberattacks with ongoing awareness training.
